

Environmental Policy

Policy Reference

SF-POL-ENV-002

Scope

The following guidelines are to be adhered to by all Team Members, Contractors, Managers, Directors Subcontractors and Visitors.

Procedure

Swift Flow's Integrated Management System and this Policy comply with ISO 14001:2015 – Environmental Management System, as demonstrated by our Certification and high ratings from Environmental Audits undertaken by Clients. Along with this compliance and our moral obligations we recognise that an important objective is the management, preservation and sustainability of the natural Environment. Swift Flow has therefore adopted an Environmental Policy, which incorporates the principles of sustainable construction. We also try to Buy Local whenever possible.

Swift Flow is committed to protecting the Environment through enacting this Policy. The aim is to:

- Ensure that all applicable Legislation, Regulations and Codes of Practice are adhered to on all sites and works. See **Regulations Matrix (SF-ADM-ENV-002)**
 - As well as the above, Fremantle Ports Outer Harbours have their own Environmental Licences that need to be complied with at all times:
 - KBT Licence is L4476/1984/12 – KBJ Licence is L4474/1976/14.
- Promote Environmental awareness and commitment to the Policy amongst all Team Members through the provision of training.
- Provide our Policy to Suppliers and encourage them to apply sound Environmental principles.
- Encourage and support our Clients to adopt the principles of sustainability in their design process.
- Off set our carbon emissions as much as possible.
- Where possible, seek to use materials from renewable sources and recycled or recyclable materials.
- Plan works carefully to prevent pollution and minimise Environmental disturbance as a result of our activities.
- Heavy machinery is left securely onsite, where possible, to avoid the additional environmental costs to transport it from the workshop to the site each day.
- Where possible, old roof sheeting, copper pipes and white goods are recycled.
- The Office is mindful of using as little power and recycling as much as possible.
- Swift Flow uses local suppliers as often as we can to minimise transportation and pollution costs to have materials and equipment taken to site.
- Apply continual improvement by reviewing the effectiveness of Environmental controls implemented at work locations and ensure shortcomings are addressed quickly and effectively.
- Provide resources to enable implementation of this Environmental Policy, such as finance, Environmental audits and Human Resources.

In order to achieve this, Swift Flow to operate an effective Environmental Management System and Integrated Management Plan.
